

BRUSS

Weighing on Wheels

Pallet truck load indication

Bruss B-1

The Bruss B-1 is the entry model of the Bruss hand pallet truck scale line. This robust system is ideal for the cost conscious user who wants to experience the advantages of mobile weighing. The compact LCD indicator of the Bruss B-1 shows a weight indication in steps of 5 kg, with a tolerance of ± 20 kg, and works on only two AA batteries (1.5V). For the best accuracy and repeatability each pallet has to be lifted to the reference height for weighing. The B-1 has an integrated electronic height sensor which tells the indicator when the lifting height is reached. The user can see on the display when the load is lifted high enough and he can read the weight.

Functions

- ◆ Manual zero correction
- ◆ Totalling with sequence number
- ◆ Only zero setting and weighing on reference height
- ◆ Lifting height indication in display
- ◆ Visual overload alert
- ◆ Error messages in display

Specifications

Capacity: 2000 kg in 5 kg steps
Tolerance is 0,8% of the full capacity
Robust construction
Indicator housing is IP65 protected (splash water and dust proof)
Power supply by 2 AA batteries with 150 hours of autonomy, means 3000 on / off weighing cycles of 3 minutes
Low battery indication + auto shut off function after 2 minutes

Dimensions in mm

A Fork length	1150 mm
B Fork width	160 mm
C Minimum fork height	83 mm
D Maximum fork height	205 mm
E Width over forks	540 mm
F Height to top indicator	500 mm

Features

Colour	: yellow RAL 1028, epoxy painted
Weight	: 65 kg
Steering wheels	: rubber
Loading wheels	: polyurethane, tandem
